**Subject:** Re: OSC Transition Note

We will work through January. February may be office area rebuild only. Please plan for schedule at this time. However site will be shutdown feb 6th week. We have OSC annual training. I'm not sure if I updated that on last schedule. So no 2 straight weeks for you there

Regards,

Eric

Oh. I meant tours, such as me coming up weeks of 1/16 and 1/30, but probably not as deep into February?

I have 10 hour shift still listed because we had days we couldn't wrap in 9 hours. 8am start in general but sometimes GES 730am for prep.

Regards,

Eric

Ok. Same (OSC) schedule roughly, but done sooner (January), or do think there'll be changes?

Ok. That sounds good. Does this complete work in Area 5 so that you'll be beginning in another area after resuming in January?

Good Morning Carl:

How are you? We will be finishing backfill of Area 5 excavated area, load out of Area 5 medium pile, running germanium soil sample, sending out lab samples, working on the GNBC Office Area restoration (support columns, backfill, blueprint/permit visit at the city codes office) and securing of site for holiday. Below are some of the revised tasks in the draft DWO #36 (12/20/2016). You and Frank can revise as necessary Monday. I want to revise the NFB Waste Disposal Progress based on more specific manifest info that I don't have today. Thanks and let me know if there are any issues.

1. Complete clean fill truck

- transportation and backfilling of Area 5.
2. Start T&D of Area 5 “Medium Concentration Pile” on 12/19/2016 (10 trucks per day) for three days ending on 12/21/2016. Track Manifest in excel file “NFB Waste Disposal Progress”.
  3. Finish GNBC Office Area concrete support and then backfill. (DBA Rates).
  4. Finalize permit process with City of Niagara Falls Codes Enforcement Office the afternoon of December 19, 2016 with OSC and Weston.
  5. Start bid process for carpenter, electrician, and plumber (DBA Rates).
  6. Secure site for holiday break. Rearrange fencing around staging areas in Areas 1 & 5 as per OSC direction.
  7. Investigate rental on a rock crusher for soil samples as discussed.
  8. Demobe mini excavator, 100 feet of lay flat hose, the city water meter and any other equipment that won't be used through January and February 2017.

Attached is:

- The OSC Log pdf
- OSC log excel sheet for you to populate
- The write up for the last PolRep (please use for Wed bullet plus whatever you have to add)
- Weston to do list
- The last GES DWO
- The next DWO for you to revise
- NFB Waste Disposal Progress Draft
